IFA 2008: Hall 26, Booth Nr. 116

STRONG SRT 5246: Digital TV Receiver for Satellite and Terrestrial Next Generation of the Hybrid Receiver: Faster and more flexible

Vienna, August 2008

STRONG will introduce the next generation of the successful hybrid receiver SRT 5245 at IFA 2008. With improved technology the Digital Satellite and Terrestrial Receiver SRT 5246 facilitates 30% faster channel zapping between terrestrial and satellite channels and faster on-screen electronic TV Programme Guide (EPG).

As an exclusive 'two in one' hybrid receiver the SRT 5246 can be used as a DVB-S AND as a DVB-T receiver. Best audio and video quality and features, such as 4000 channels memory capacity, 4 favourite lists, 8 timer functions, mosaic of 4 or 9 TV channels in overview allow full, unlimited TV and radio entertainment.

Display, two SCART sockets, built-in UHF modulator, S/PDIF for connection to a HI-FI system, software update via satellite, multi-lingual audio track, subtitling and teletext support are beside many other exciting features a must-have.

The brand new STRONG Hybrid Receiver SRT 5246 will be available in November 2008.

STRONG SRT 5246: key features at a glance

- Digital Receiver for all FTA TV and radio programmes via satellite and terrestrial antenna
- 4000 channels memory capacity
